Comments on overall assessment of this course.

- I really enjoyed this class and the teaching methods were effective - especially the homework.
- It was a fairly challenging, but a very rewarding course. I definitely learned a lot.
- The class is very challenging considering most students have not had any exposure to proper mathematical logic. However, the professor was able to take this into account and make the curriculum suitable and allowed students to grasp concepts and ease there way into mathematical thinking.
- The course is very interesting, and I enjoyed it. It is just the summer so I did not spend as much time thinking about the coursework as usual. The workload was significant, but compared other classes in physics and some math, it was not very much. Cass is great, and really seems like he knows his stuff. He is also very clear which is hard to find in most math professors these days.
- Very good instructor, though there was a lot of material to be covered in such a short time span. It was hard to take in everything, even when working out material everyday.
- Would be nice to have all homeworks back before the test to see out work versus the solutions and identity what mistakes we made before taking the exam. A practice exam or set of questions befor4 each exam or even the final will be helpful knowing format and how the test will look before going into them.
